

Pekan Pengenalan Kampus 2026/2027
UNIVERSITAS KATOLIK WIDYA MANDALA SURABAYA

CAMPUS ORIENTATION WEEK 2026/2027
WIDYA MANDALA SURABAYA CATHOLIC UNIVERSITY

INFORMASI PENDUKUNG
ADDITIONAL INFORMATION

A Life-improving University

Demikianlah Universitas Katolik Widya Mandala Surabaya (UKWMS) menetapkan *positioning statement*-nya, "suatu universitas yang meningkatkan dan mengembangkan kehidupan sesama". Hal ini selaras dengan visi, misi, dan semboyan Universitas, yaitu "Non Scholae Sed Vitae Discimus" yang berarti "Kita belajar bukan hanya demi ilmu pengetahuan belaka, melainkan demi kehidupan". Manusia diciptakan bukan hanya untuk dirinya sendiri, melainkan setiap langkah kehidupannya harus juga dapat berarti bagi orang lain.

Kampus adalah tempat pembentukan dan peningkatan kehidupan, baik bagi warga kampus (internal) maupun bagi masyarakat luas (eksternal) melalui program *outreach* dan *community development*. Mendidik bukan hanya bertujuan untuk mengisi otak dengan berbagai pengetahuan, tetapi bertujuan untuk membentuk seorang pribadi manusia yang utuh. Melalui program pengembangan di dalam kampus, mahasiswa difasilitasi untuk bertumbuh menjadi seorang manusia dewasa yang matang secara iman, karakter, ketrampilan, dan intelektualitasnya. Hal ini antara lain direfleksikan melalui penghayatan dan pengamalan nilai-nilai Universitas Katolik Widya Mandala Surabaya, yaitu kebenaran ilmiah, kebebasan akademik, keadilan, cinta kasih, kerendahan hati, kejujuran, kesederhanaan, integritas, ketekunan, dan kesabaran.

"Others see a student, but we see a future leader" "Others see a student, but we see an agent of change" "Others see a student, but we see talent"

Demikianlah Universitas Katolik Widya Mandala Surabaya memandang dan menghargai setiap potensi dari mahasiswa sebagai suatu pribadi yang unik dan penuh dengan idealisme. Hal ini akan menimbulkan sinergi yang luar biasa untuk mencapai tujuan seperti ungkapan di atas, apabila benih tersebut (*baca: mahasiswa*) ditaburkan dan tumbuh di tanah yang subur (*baca: kampus kehidupan UKWMS*).

Pendidikan harus merupakan kombinasi yang sempurna dari kegiatan olah pikir/olah intelektual, olah hati, olah rasa, dan olah raga. Literasi dasar yang harus dimiliki warga masyarakat global adalah literasi bahasa, angka, saintifik, teknologi komunikasi dan informasi, finansial, serta budaya dan kewarganegaraan. Kualitas karakter yang harus dihidupi adalah rasa ingin tahu, berinisiatif, gigih/pantang menyerah, adaptif, kepemimpinan, serta kepedulian sosial dan budaya. Oleh sebab itu, seluruh mahasiswa wajib mengikuti kegiatan ekstra-kurikuler, baik di dalam maupun di luar kampus, selama menempuh proses pendidikan. Hal ini perlu dilakukan untuk membentuk kompetensi *soft skills* dan membangun jejaring/*networking*, selain pembentukan kompetensi *hard skills* (keahlian di bidang ilmunya). Empat faktor yang diyakini memberikan kontribusi pada keberhasilan dalam dunia kerja pada saat ini dan masa yang akan datang adalah *soft skills* (40%), *networking* (30%), *hard skills* (20%), dan modal finansial (10%).

Dengan *positioning statement* "A life-improving University", maka proses pembelajaran di kampus UKWMS senantiasa mengedepankan program pengembangan *alternative learning, leadership learning, workplace learning, creativity learning, learning to serve, learning to care, dan learning across cultures*, untuk mempersiapkan para mahasiswa menjadi warga masyarakat global. Dengan demikian, berbagai *soft skills* yang sangat dibutuhkan pada abad ke-21 dapat dikuasai oleh para mahasiswa UKWMS sebelum mereka lulus, antara lain *basic skills, technology skills, complex problem solving skills, multicultural/multilingual literacy, interpersonal skills, social skills, inquiry/reasoning skills, process skills, system skills, information/digital literacy, critical and creative thinking skills, resource management skills, dan communication skills*.

A Life-improving University

This is how Widya Mandala Catholic University Surabaya (UKWMS) establishes its positioning statement: "a university that enhances and develops the lives of others." This is aligned with the University's vision, mission, and motto, namely *"Non Scholae Sed Vitae Discimus,"* which means "We learn not solely for the sake of knowledge, but also for life." Human beings are created not only for themselves; rather, every step of their lives must also be meaningful to others

The campus is a place for the formation and enhancement of life, both for campus members (internally) and for the wider community (externally) through outreach and community development programs. Education aims not merely to fill the mind with various kinds of knowledge, but to form a whole human being. Through on-campus development programs, students are facilitated to grow into mature adults who are sound in faith, character, skills, and intellect. This is reflected, among other things, through the internalisation and implementation of the values of Widya Mandala Catholic University Surabaya, namely scientific truth, academic freedom, justice, love, humility, honesty, simplicity, integrity, diligence, and patience.

"Others see a student, but we see a future leader" "Others see a student, but we see an agent of change" "Others see a student, but we see talent"

This is how Widya Mandala Catholic University Surabaya views and values the potential of each student as a unique individual full of idealism. This will generate an extraordinary synergy to achieve the aforementioned goals, provided that the seeds (i.e., the students) are sown and grown in fertile soil (i.e., the UKWMS campus of life).

Education must be a perfect combination of intellectual, spiritual, emotional, and physical cultivation. The basic literacies that members of the global community must possess are linguistic, numerical, scientific, communication and information technology, financial, as well as cultural and civic literacies. The character qualities that must be lived out include curiosity, initiative, grit/perseverance, adaptability, leadership, as well as social and cultural awareness. Therefore, all students are required to participate in extra-curricular activities, both on and off-campus, throughout their educational journey. This is necessary to build soft skills competencies and establish networks, alongside the formation of hard skills competencies (expertise in their respective fields of study). Four factors believed to contribute to success in the professional world today and in the future are soft skills (40%), networking (30%), hard skills (20%), and financial capital (10%).

With the positioning statement "A Life-Improving University," the learning process at the UKWMS campus consistently prioritizes alternative learning, leadership learning, workplace learning, creativity learning, learning to serve, learning to care, and learning across cultures programs to prepare students to become global citizens. Consequently, various soft skills highly demanded in the 21st century can be mastered by UKWMS students prior to graduation, including basic skills, technology skills, complex problem-solving skills, multicultural/multilingual literacy, interpersonal skills, social skills, inquiry/reasoning skills, process skills, systems skills, information/digital literacy, critical and creative thinking skills, resource management skills, and communication skills.

TRADISI ILMIAH di PERGURUAN TINGGI

PENDAHULUAN

Setiap keluarga, sebagai masyarakat kecil, mempunyai tatanan/tata krama/aturan sendiri yang ditetapkan, dalam tata kehidupan berkeluarga tersebut. Demikian pula setiap masyarakat sesuai dengan lingkup tujuan yang hendak dicapai.

Kehidupan kampus dikembangkan sebagai masyarakat ilmiah yang berwawasan budaya bangsa, bermoral Pancasila dan berkepribadian Indonesia, masyarakat ilmiah yang berada di kampus, merupakan bagian dari masyarakat politik, masyarakat industri, dan lain-lain. Dengan tugas dan fungsi yang berbeda-beda, tetapi pada dasarnya, masyarakat tersebut bertujuan sama, yakni mensejahterakan masyarakatnya, yang secara akumulatif akan meningkatkan taraf kesejahteraan dan meningkatkan harkat dan martabat bangsa.

Kehidupan pada hakekatnya, memerlukan tatanan/tata krama/aturan, agar kehidupan tersebut berjalan sesuai dengan misi dan cirinya, dalam mencapai tujuan yang dikehendaknya. Dengan kata lain, maka setiap anggota masyarakat yang mau hidup dalam lingkungan masyarakat tertentu, pasti harus sesuai dengan tatanan pada masyarakat tersebut, apabila ingin menghidupkan nilai kehidupan, dengan tenang dan dinamis, tanpa menimbulkan konflik-konflik akibat tak ada kesesuaian. Bayangkan saja seandainya petani masuk dalam masyarakat seniman, atau pedagang masuk dalam masyarakat advokat.

MASYARAKAT ILMIAH

Masyarakat ilmiah merupakan kategori masyarakat yang warganya memiliki sifat-sifat ingin mengetahui segala fenomena yang ada, dengan melakukan kegiatan pengkajian ilmiah, agar diperoleh kebenaran yang teruji sesuai dengan metode ilmu pengetahuan.

Untuk itu pastilah, masyarakat ilmiah mempunyai sistematika/kerangka berpikir yang sistematis, berdasarkan data dan fakta, dan kemampuan untuk menganalisisnya, sehingga didapatkan suatu kebenaran yang teruji. Dengan demikian masyarakat ilmiah tersebut memiliki ciri-ciri antara lain:

1. Kritis
2. Obyektif
3. Analitis
4. Kreatif dan konstruktif
5. Terbuka dan berlapang dada untuk menerima kritik
6. Menghargai prestasi ilmiah/akademik
7. Bebas dari prasangka
8. Kesejahteraan/kemitraan, khususnya di kalangan sivitas akademika
9. Dialogis
10. Memiliki dan menjunjung tinggi norma dan susila akademik, serta tradisi akademik/ilmiah
11. Dinamis
12. Berorientasi ke masa depan, dengan mengacu pada kondisi masa kini.

Sudah barang tentu, metode dan proses pembelajaran yang dipergunakan dalam masyarakat ilmiah ini berbeda dengan yang lazimnya diterapkan di SLTP dan SLTA yang semuanya bersifat satu arah.

Dalam tata kehidupan kampus di perguruan tinggi, *dosen, mahasiswa dan alumni* yang ketiganya sebagai sivitas akademika, dalam mengembangkan ilmu pengetahuan sudah selayaknya menggunakan *metoda discourses* atau *dialogis* dalam proses pembelajaran.

SCIENTIFIC TRADITIONS in HIGHER EDUCATION

INTRODUCTION

Every family, as a small community, has its own established order, etiquette, and rules within its household life. The same applies to every society, in accordance with the scope of the goals to be achieved.

Campus life is developed as a scientific community with national cultural insight, Pancasila morality, and an Indonesian personality. The scientific community within the campus is a constituent part of the political community, industrial community, and others. While their tasks and functions differ, these communities fundamentally share the same objective: to prosper their society, which cumulatively will raise the standard of welfare and elevate the dignity and honor of the nation.

Life, in essence, requires an order, etiquette, and rules so that it may proceed in accordance with its mission and characteristics to achieve its intended goals. In other words, any member of society who wishes to live within a specific community environment must conform to the order of that community, if they desire to cultivate the values of life peacefully and dynamically, without creating conflicts due to incompatibility. Imagine if a farmer were to enter an artist community, or a merchant were to enter a legal advocates community.

THE SCIENTIFIC COMMUNITY

The scientific community is a category of society whose citizens possess a desire to understand all existing phenomena by conducting scientific studies, thereby obtaining verified truths in accordance with scientific methods.

To this end, a scientific community must possess a systematic framework of thinking based on data and facts, as well as the analytical capability to derive verified truths. Accordingly, the scientific community exhibits characteristics such as being:

1. Critical
2. Objective
3. Analytical
4. Creative and constructive
5. Open-minded and receptive to criticism
6. Appreciative of scientific/academic achievements
7. Free from prejudice
8. Egalitarian/partnership-oriented, especially among the academic community (*sivitas akademika*)
9. Dialogue-driven
10. Possessing and upholding academic norms and ethics, as well as academic/scientific traditions
11. Dynamic
12. Future-oriented, with reference to current condition

Undoubtedly, the instructional methods and learning processes utilized within this scientific community differ from those commonly applied in junior and senior high schools, which are generally one-way. In the governance of higher education campus life, lecturers, students, and alumni—who together comprise the academic community—should appropriately utilize discourse or dialogical methods in the learning process to develop knowledge

TRADISI dan KEBEBASAN AKADEMIK

Dalam masyarakat ilmiah, selain adanya tradisi diperlukan pula adanya peraturan-peraturan. Bayangkan bila suatu masyarakat tidak punya tatanan/tata krama/aturan yang mengikat dan mengatur warganya. Tradisi dan peraturan (*tradition and rules*) merupakan kesatuan yang secara serentak mengatur tertib masyarakat akademik di kampus. Tradisi memberikan kemantapan pada kehidupan akademik di kampus, sedangkan peraturan/tatanan dirumuskan demi penyesuaian dan pemutakhirannya dari waktu ke waktu.

Perlu dicatat bahwa tertib kemasyarakatan akademik di suatu kampus, niscaya akan terpelihara bilamana tradisi akademik dan peraturan yang berlaku dijadikan pedoman perilaku bagi warga kampus itu sendiri.

Setiap masyarakat almamater memiliki tradisi dan peraturan sesuai dengan kesejahteraan sebagai suatu masyarakat akademik. Makin kukuh tradisi akademik suatu almamater, makin kurang diperlukan peraturan tambahan. Itulah sebabnya, dalam suatu almamater dengan tradisi yang mantap, perilaku warganya cukup kuat berpedoman pada kaidah-kaidah yang merupakan pengejawantahan tradisi akademik yang bersangkutan. Dengan demikian, citra dan wibawa akademik dari almamater dapat memancar ke masyarakat lain dan masyarakat akademik tersebut diakui keberadaannya secara nyata.

Hal ini berarti bahwa tradisi lebih berkaitan dengan nilai, norma, dan etika yang mengatur sikap dan perilaku warganya, misalnya:

1. Tidak pernah merasa dirinya sebagai orang yang paling benar.
2. Hasil penelitian seorang akademika selalu terbuka atas kritik dan usulan penelitian lebih lanjut.
3. Proses pembelajaran selalu menciptakan suasana *discourses* (dialogis) dan tidak hanya *courses* (searah).

Setiap peraturan selalu menuntut agar warga dari suatu masyarakat untuk mematuhi dan mengikutinya secara cermat, misalnya:

1. Mahasiswa baru harus mendaftar ulang.
2. Dalam sistem kredit semester, dituntut kehadiran mahasiswa minimum 75%, dalam mengikuti kegiatan tatap muka, kegiatan terstruktur, dan lain-lain.

Sesuai dengan Peraturan Pemerintah Nomor 30 Tahun 1990 Bab VI Pasal 17 dan 18, pada garis besarnya kebebasan akademik mengandung pengertian:

1. Kebebasan menyatakan pemikiran dan pendapat sesuai dengan norma dan kaidah keilmuan.
2. Kebebasan seorang anggota sivitas akademika untuk melakukan kegiatan belajar dan seorang dosen dalam melakukan kegiatan mengajar di perguruan tinggi.
3. Kebebasan dosen dan mahasiswa untuk melakukan penelitian dalam rangka mengembangkan ilmu pengetahuan.

Terwujudnya Masyarakat Ilmiah yang Berwawasan Budaya Bangsa, Bermoral Pancasila dan Berkepribadian Indonesia merupakan cita-cita dari setiap Perguruan Tinggi. Sebagaimana ciri suatu masyarakat ilmiah, maka tidaklah ada artinya apabila kemanfaatan dari hasil karyanya tidak ditujukan untuk kepentingan bangsa. Artinya perilaku dan daya yang digunakan oleh masyarakat ilmiah sudah sewajarnya mengangkat harkat dan martabat bangsanya.

Tanpa wawasan kebangsaan serta budaya yang melingkupinya, maka karya suatu masyarakat ilmiah hanya dimanfaatkan oleh bangsa lain, yang pada akhirnya tidak mampu mengangkat peranan bangsa sebagai bangsa yang terpadang, yang mempunyai citra dan wibawa kehidupan sesuai dengan harga diri suatu bangsa. Moral masyarakat ilmiah Indonesia harus sejalan dengan falsafah atau pandangan hidup bangsa yakni Pancasila.

Oleh karena itu, Pancasila perlu dihayati dan dipahami secara mendalam sehingga produk atau karya hasil kajian dan penelitian termasuk pula proses yang dijalaninya tidak bertentangan dengan pandangan hidup bangsa Indonesia.

Hasil karya yang besar tanpa dilandasi moral agama dan perikemanusiaan akan menyebabkan kehancuran masyarakat atau bangsa (misalnya: penemuan senjata kimia, penemuan bom atom, penemuan morfin), juga dalam proses berkarya tanpa moral Pancasila, muncul para plagiat yang mengeruk keuntungan pribadi, selain terabaikannya tenggang rasa sesama anggota masyarakat ilmiah dalam memberikan informasi dan komunikasi terbuka.

ACADEMIC TRADITION AND FREEDOM

Within a scientific community, regulations are required in addition to traditions. Imagine if a society had no binding order, etiquette, or rules to govern its citizens. Tradition and rules form a unified whole that simultaneously regulates the order of the academic community on campus. Tradition provides stability to academic life on campus, whereas regulations and order are formulated for adaptation and modernization over time.

It should be noted that the order of the academic community on a campus will undoubtedly be maintained if the prevailing academic traditions and regulations serve as behavioral guidelines for the campus members themselves.

Every alma mater community possesses traditions and regulations commensurate with its welfare as an academic society. The stronger the academic tradition of an alma mater, the less additional regulation is required. Therefore, in an alma mater with established traditions, the behavior of its members is firmly guided by principles that embody those academic traditions. Consequently, the academic image and authority of the alma mater can radiate to other societies, and the existence of the academic community is tangibly recognized.

This implies that tradition relates more closely to values, norms, and ethics that govern the attitudes and behavior of its members, for example:

1. Never considering oneself to be entirely correct.
2. Ensuring that an academic's research findings remain open to criticism and proposals for further research.
3. Ensuring that the learning process always fosters an environment of discourse (dialogical) rather than just courses (one-way).

Every regulation invariably demands that members of a community meticulously obey and follow it, for example:

1. New students must complete re-registration.
2. Under the semester credit system, a minimum student attendance of 75% is required for face-to-face sessions, structured activities, and other academic obligations.

In accordance with Government Regulation Number 30 of 1990, Chapter VI, Articles 17 and 18, academic freedom broadly encompasses:

1. The freedom to express thoughts and opinions in accordance with scientific norms and principles.
2. The freedom of a member of the academic community to engage in learning activities and of a lecturer to conduct teaching activities in higher education.
3. The freedom of lecturers and students to conduct research for the advancement of science and technology.

The realization of a Scientific Community with National Cultural Insight, Pancasila Morality, and an Indonesian Personality is the ideal of every higher education institution. As is characteristic of a scientific community, the utility of its works is meaningless if it is not directed toward the interests of the nation. This means that the conduct and efforts exerted by the scientific community should naturally elevate the dignity and honor of its nation.

Without a national outlook and the encompassing culture, the work of a scientific community may only be utilized by other nations, ultimately failing to elevate the nation's role as a respected entity possessing an image and authority of life commensurate with a nation's self-esteem. The morality of the Indonesian scientific community must align with the nation's philosophy or outlook on life, namely Pancasila.

Therefore, Pancasila must be deeply internalised and understood, ensuring that the products or works resulting from study and research, as well as the processes undertaken, do not conflict with the Indonesian nation's outlook on life.

Great works without a foundation of religious morality and humanity will lead to the destruction of a society or nation (e.g., the invention of chemical weapons, the atomic bomb, or morphine). Furthermore, conducting work without Pancasila morality breeds plagiarists who seek personal gain, alongside the disregard for mutual consideration among fellow scientific community members in providing open information and communication.

KEHIDUPAN MASYARAKAT DI LUAR KAMPUS dan MASYARAKAT BANGSA

Selain masyarakat ilmiah, berdasarkan pola kehidupannya, terdapat pola masyarakat politik, masyarakat seniman, masyarakat keagamaan, masyarakat industri, masyarakat ekonomi, dan lain-lain.

Setiap masyarakat memiliki nilai, norma, dan etika serta peraturan sendiri untuk menjaga kelangsungan hidupnya, dan secara akumulatif akan menunjang kelangsungan hidup masyarakat. Mahasiswa sesungguhnya memiliki dimensi yang luas. Selain sebagai anggota sivitas akademika (dimensi ilmiah), mahasiswa memiliki dimensi kepemudaan dan dimensi politik. Secara pribadi, seorang mahasiswa sebagai pemuda dapat terpapar dalam dunia kepemudaannya. Mereka dapat dan boleh mengikuti *organisasi kepemudaan* di luar kampus seperti LSM, Ormas, dan Orpol.

Dengan demikian, jelaslah bahwa mahasiswa sebagai orang per orang/pribadi tidak dibatasi untuk mengembangkan dirinya, mencari pengalaman hidup di luar kampus, dengan segala konsekuensi dan resiko yang telah dipahami. Tetapi harus diingat bahwa mahasiswa sebagai anggota masyarakat ilmiah tidak dapat dibenarkan, bila yang bersangkutan berkeinginan untuk menetapkan nilai-nilai, norma-norma dan etika masyarakat lain ke perguruan tinggi, sebab hal ini akan menimbulkan kerancuan, bahkan konflik, karena ketidaksesuaian norma, nilai, kaidah, dan tradisi yang dianut dalam masyarakat ilmiah.

MAHASISWA SEBAGAI WARGA NEGARA

Dalam masyarakat modern, negara merupakan organisasi yang paling besar dan berpengaruh bagi kehidupan warga negaranya. Negara menuntut kepatuhan, disiplin, dan partisipasi dari setiap warga negaranya, di samping menjamin hak-hak warga sesuai dengan peraturan perundangan yang berlaku. Seorang mahasiswa wajib memahami segala peraturan dan perundangan yang berlaku di Republik Indonesia ini. Paling tidak, perlu dipahami berbagai pasal dari hukum yang sering membahayakan seseorang bila dilanggar, misalnya:

1. Kewajiban menghormati martabat dan nama baik seseorang
2. Kewajiban menghormati hak milik seseorang, termasuk milik negara
3. Kewajiban bela negara
4. Kewajiban menghormati setiap pejabat/pegawai negeri yang sedang melakukan tugasnya
5. Dilarang membocorkan rahasia negara, menyebar rasa permusuhan terhadap negara dan pemerintah yang sah, propaganda yang bersifat komunisme dan atheisme, melawan Pancasila

COMMUNITY LIFE OUTSIDE THE CAMPUS AND THE NATIONAL SOCIETY

In addition to the scientific community, based on patterns of life, there are political communities, artist communities, religious communities, industrial communities, economic communities, and others.

Each community possesses its own values, norms, ethics, and regulations to safeguard its continuity, which cumulatively support the survival of society as a whole.

Students actually possess broad dimensions. In addition to being members of the academic community (the scientific dimension), students possess youth and political dimensions. Personally, a student as a youth can be involved in the youth sphere. They can and are permitted to join youth organizations outside the campus, such as NGOs, civil society organizations, and political organizations.

Thus, it is clear that students as individuals are not restricted from self-development or seeking life experiences outside the campus, with all the understood consequences and risks. However, it must be remembered that students as members of the scientific community cannot be justified if they seek to impose the values, norms, and ethics of other societies onto higher education institutions. This would lead to confusion or even conflict due to the incompatibility of the norms, values, principles, and traditions upheld within the scientific community.

STUDENTS AS CITIZENS

In modern society, the state is the largest and most influential organization in the lives of its citizens. The state demands obedience, discipline, and participation from every citizen, while simultaneously guaranteeing citizens' rights in accordance with prevailing laws and regulations.

A student is obliged to understand all laws and regulations in force in the Republic of Indonesia. At the very least, it is necessary to understand various statutory provisions that frequently place an individual at risk if violated, for example:

1. The obligation to respect the dignity and reputation of others.
2. The obligation to respect the property rights of others, including state property.
3. The obligation of national defense.
4. The obligation to respect every public official/civil servant performing their duties.
5. The prohibition against leaking state secrets, spreading hostility toward the state and the legitimate government, propagating communism and atheism, or opposing Pancasila.
